

A scatter plot showing the relationship between two variables, X and Y. The X-axis ranges from -8 to 6, and the Y-axis ranges from -2 to 6. The data points are numbered 1 through 156. The points are distributed across the plot, with a higher density in the central region (X between -4 and 2, Y between -2 and 2). The points generally follow a positive linear trend, indicating a positive correlation between the two variables. The points are colored blue and have black numerical labels next to them.
