

The heatmap displays the Hamming distance between pairs of 4-bit Gray code words. The sequence of words is 0000, 0001, 0011, and 0010. The color scale ranges from white (distance 0) to black (distance 4). The matrix is symmetric, with the highest distance of 4 occurring between the first and last words (0000 and 0010).
